

Downton's Wireline Division of Versa-Line Services

Downton's
SLICKLINE | SWABBING | E-LINE

We're excited to announce that Downton's Wireline, a trusted leader in wellsite services throughout Western Canada, is now part of Versa-Line Services.

Downton's
SLICKLINE | SWABBING | E-LINE

This acquisition brings together two companies with a shared focus on safety, efficiency and exceptional service. Our combined capabilities ensure we can continue to deliver the same experience you know – now with the added support of a larger team and reach.

Downton's Wireline: 12 Years of Trusted Service

Downton's Energy Services has built a strong reputation in Grand Prairie and Fort St. John for delivering leading-edge cased hole wireline, slickline, swabbing, and well testing services—tailored for completions, workovers, and abandonment solutions.

Backed by a leadership team with over 200 years of combined industry experience, Downton's operational excellence is well established and well earned.

What This Means For Your Business

- ✓ Same exceptional staff, systems & standards
- ✓ Same responsive service and safety-first culture
- ✓ Expanded field capacity and coverage

Our Expanded Offerings

ELECTROMAGNETIC DEFECTOMETER (EMD)

Measures metallic damage in two concentric casing strings (e.g. production tubing and casing). Detects cracks, corrosion, wall thinning, and downhole tool positions—without pulling the tubing, saving time and cost.

CONCENTRIC CASING INSPECTION

High-resolution evaluation of multiple casing strings in one run. Measures ovality, corrosion, and potential wellbore collapse risks for efficient workover planning.

MULTI-ARM CASING INSPECTION TOOL (MCT)

High-precision internal surface scanning using 24, 40, 60, and extended 60-arm tools. Covers tubing sizes from 45mm to 245mm. Delivers 3D statistical imaging and color-mapped visualizations of casing condition.

RADIAL CEMENT BOND TOOL

High-speed cement bond log using segmented 8-receiver mapping. Offers amplitude, transit time, VDL, and attenuation imaging—up to 3x faster than conventional tools. Ideal for full-well overviews and detailed bonding analysis.

SWABBING SERVICES

¼" braided line (11,400 lbs breaking strength)
5000 PSI pressure control equipment
Casing & tubing swabbing
Plunger and bumper spring installs
Dewaxing, broaching, and swaging tools

COMPLETION SERVICES

A fully equipped cased-hole
logging and perforating division

WELL TESTING & WORKOVERS

Equipment selection
Flare stacks
Pipe and manifold setups
Full planning and field support

INTEGRAVIEW™ CEMENT TOP LOCATOR TOOL

A cutting-edge sonic tool to identify cement
tops behind a second casing string using
multi-sensor acoustic mapping. Field-tested
in Canada with proven performance
identifying second-annulus barriers.
